

# MERRILL

**DESIGN • FABRICATE • MACHINE • INTEGRATE**

## Who is MERRILL

MERRILL Technologies Group, Inc. (MERRILL) is a highly innovative American small business delivering contract manufacturing services to the defense, aerospace, heavy equipment, automation, energy and transportation markets. Family-owned and headquartered in Saginaw, MI, we have over 350 skilled and value-driven team members and nearly 700,000 sq. ft. of manufacturing floor space. Our resources are dedicated to the design, fabrication, machining and integration of components, systems and programs.

## What We Do

For more than 50 years, MERRILL has been a trusted partner to world leaders by producing high-quality, cost-effective manufacturing solutions designed to help our customers drive their businesses forward.

In the last 24-months, MERRILL has invested over 30 million in equipment and technology, making us able to meet our customers' most challenging needs – on any scale. We take pride in offering our customers the following capabilities and technology:

- More than 700,000 sq. ft. of manufacturing floor space
- Round-the-clock productivity by Lean and Six Sigma certified team members
- Powerful, manufacturing-specific ERP system
- Virtual costing system that reproduces MERRILL facility floors
- Single point-of-contact program management
- Manufacture parts ranging from ounces to tons and volumes ranging from prototypes to production quantities
- 3, 4 and 5-axis CNC machining centers with the ability to turn up to 12 ft. and mill up to 54 feet
- Lifts and positioners that can handle weldments up to 100 tons
- State-of-the-art, 20x20x90 ft. blast and paint booths
- In-house, AWS Welding Institute and Accredited Testing Facility
- Secure, seven acre site dedicated to system integration and testing
