

ROE TOOLING

Roe Tooling has been serving its customers with their machining needs since 1979. Founded in a small shop located in Clare, Michigan, Roe Tooling began with a manual lathe and mill, and a strong focus on customer support. Today, the company is located in 3,600 sq. ft. of space with two CNC lathes and a CNC mill, and remains committed to providing the same high level of customer service.

From the beginning, Roe Tooling has built a reputation of working with the client to produce the parts they require. Whether it be a single component for repairs, a prototype, or short to long production runs, we cater to a diverse array of industries, including transportation, forestry, agriculture, oil & gas, and staging, as well as local small and large-scale manufacturing.

Roe Tooling is dedicated to providing personalized attention to all of our clients. We look forward to the opportunity to work with you and provide the machining solutions you need.
